Projects

ANALYZING COMMUTING PATTERNS AND CHALLENGES AMONG STUDENTS AND EMPLOYEES IN UDUMALPET, PALANI, AND POLLACHI REGION

01/2025 – 04/2025

The research aims to identify the common modes of transport, average commute times, frequency of travel, satisfaction levels, and the major issues encountered during commuting. Data was collected using a structured questionnaire among 100 respondents. The findings highlight key areas of concern such as inadequate public transport, poor road conditions, and high travel costs. The study provides insights to improve regional transportation planning and policy-making for enhancing commuter convenience
