### PROJECTS

#### Study-hub 2.0

React.js, Hooks, Tailwind CSS, Figma

#### Description:

This application allows students to access their purchased courses and view related materials like videos, PDFs, and quizzes. Sprout is used for video playback, and PDFTRON is used to display PDF content.

## Online School Management System

React.js, Hooks, Tailwind CSS, HTML, Figma

### Description:

Designed & developed the front end of an Online School Management System using React.js, HTML, and CSS. The platform included role-based dashboards for admins, teachers, and students, enabling key functions like student enrollment, class scheduling, attendance tracking, assignment management, and internal communication. Designed a fully responsive UI for seamless access across all devices. The system streamlined daily operations, reduced manual work, and improved overall productivity and transparency.

## Bustle Spot Application

HTML, CSS, Bootstraps, Figma, Adobe Illustrator

### Description:

Designed in Figma screens and logo for web application. Developed landing pages and admin and user CRM pages using HTML, CSS3, Bootstraps. Bustle-spot is an actively tracking platform. Where the project manager assign a task for specific user and track the project status. The employee is also able to create a own task and it will keep on track for each task.
