### Work Experience

#### System Engineer

TATA Consultancy Services Ltd. (Client: COOP)

08/2021 – Present | Pune

- Axway B2Bi Middleware Integration Developer responsible for building and maintaining integration interfaces and ensuring seamless operations in QA and test environments.
- Lead developer for Axway B2Bi, focusing on the development and optimization of complex EDI interfaces across projects such as Windsor, DRS, and Franchise. Worked on format transformations including JSON to JSON, CSV to JSON, and IDOC to Flat File, while ensuring strict adherence to design and delivery standards.
- Independently developed interfaces from scratch, handling the full development cycle and comprehensive testing.
- Sole developer for the BAU (Business As Usual) stream, responsible for delivering key enhancements and project work, building new interfaces, and supporting the testing team.
- Contributed to the development of both standard-mode and limited-mode interfaces based on project requirements.
- Developed database mappings with Oracle DB to enable efficient data transformation and seamless integration with backend systems.
- Wrote and executed SQL queries in SQL Developer to support data transformation and validation.
- Deployed developed interfaces to production environments, coordinating with release teams and performing post-deployment validations to ensure smooth go-lives.
- Executed in-depth requirement analysis and formulated IRD documentation to ensure alignment with testing architecture and support protocols.
- Authored support documentation and handover materials post production deployment to ensure smooth transition and issue resolution.
- Maintained smooth operation of QA and pre-production environments through regular monitoring and proactive issue resolution.
- Supported unit and functional testing for map validation, and assisted in performance tuning and issue resolution during deployment and HyperCare phases.
