Projects

As a Technical Lead (Brazil Tax Reform Project)

6 Months

Current Project:

Working as a Technical Lead and Developer analysing the new Tax reform changes for Brazil and making the required changes using M3 to meet business requirements. Distributing the tasks within the team, reviewing the code, constructive discussions with business in completing the tasks with-in the bounded timelines etc... are the roles included in the project along with MAK Development.

As an Infor M3 Technical Consultant

3 Years

Project 2:

I worked as an ERP Consultant, providing technical support to resolve application-related issues and address end- user concerns, ensuring smooth system functionality. My role included fixing vulnerabilities on application servers, coordinating with third-party vendors for application upgrades, and assisting end users in resolving application-related problems.

Project 1:

Worked as an Open Text Streamserve Developer built several programming projects for a separate Division and connected the programs to Infor M3 Application. This project included creating Control Centre application (service), developing projects, deploying, connecting platform connections, working on Quealias, Overlays, Global resourceset, substitution tables etc..
