PROJECTS

LogicMonitor

- LogicMonitor is a SAAS based application which provides cloud-based infrastructure monitoring capabilities

Phoenix - Disaster Recovery

- Phoenix - Disaster Recovery provides easy and one click setup of VMware Virtual Machines on AWS as EC2 instances.

FUZE (Desktop / Web / Mobile App)

- Cloud-based app offering Unified Communications as a Service. User can chat, share content, make audio calls, share video and screenshare, create / schedule meetings and invite other users to join.

ACHIEVEMENTS

JIRA-Zephyr integration with python

Successfully integrated JIRA-Zephyr with python automation framework through Rest API calls

AWS / Azure Cleanup

Created python utility scripts for cleanup of unwanted / stale resources like S3 Buckets, EC2 instances, AMIs etc and Azure VMs which reduced overall cost for cloud consumption
