PROJECT – 2 (Support)

Client: AG Inc Corps, US

Duration: April 2025 to till date

Designation: SAP ABAP Technical Consultant

American Greetings is a global leader in the large and enduring Celebrations marketplace for greeting card manufacturers.

- Worked with new inline coding for report creation.

- Developed an ALV report to display material document list details based on material number and plant stock availability. The report drill down to display two different reports on one screen, which are to show the stock availability in the plant and its storage location details.

- Created Vendor Performance Report that lists Vendor Name, Materials Supplied, Planned and Actual Delivery Times, Payment terms, and Prices.

- Developed a program to create sales orders based on the quotation details using the BAPI BAPI_SALESORDER_CREATEFORMAT2. The quotation is displayed in an ALV and selected quotations are processed.

- Developed a module pool program to display the customer bank details based on customer numbers using OOALV.

- Developed an enhancement using BADI to validate base unit of measure using BADI_MATERIAL_CHECK for MM01 transaction.

- Developed an enhancement using customer exit as per the customer requirements for VL01 transaction to add a tab for capturing transportation details such as vehicle number, and container number.

PROJECT – 1 (Support)

Client: Textron

Duration: October 2024 to March 2025

Designation: SAP ABAP Technical Consultant

The company leverages its global network of aircraft, defense, industrial, and finance businesses to provide customers with innovative products and services.

- Implemented back-end support of form designing.

- Developed smartforms to issue credit card statements to customers for the bank

- Developed the smartforms for Certificate of Analysis(COA) in Chinese language

- Developed an interactive OOALV report, to display Purchase document header details in the basic list, and when clicked on any one of the PO numbers, purchase item details get displayed in the secondary list.

- Created an implicit enhancement to validate the currency field in the VA01 transaction.

- Implemented User Exit Whenever a business user creates a delivery order, The standard SAP application does not check for storage location (whether it is space or not) if it is a space it should raise an error message.

- Created an ALV list report for multiple drill down that displays the bill of materials for a particular material selected and their quantity, There should be a button on the ALV when clicked, It should provide the Vendor details and when clicked on the Vendor it should provide the bank details for that vendor.
