- Hands-on experience in Using VSTS and GitBash for code repository and as a version control mechanism.

- Extensive experience in designing User Interface applications and integrating highly transactional and scalable applications using HTML, Angular 16+, JavaScript CSS, Bootstrap, Figma, Adobe XD, illustrator, WordPress, Photoshop, and Framer.

Education

- **Bachelor of Computer Application (BCA) From Acharya Nagarjuna University (ANU), Andhra Pradesh. (2017-2021)**

Work Experience

- **Worked as a Junior Software Engineer at Village It Services since 2019-2022 October.**

- **Working as a senior Software Engineer at Logicloop Ventures LLP since 2022-2025 July.**

Key Skills

- **Functional:** Client Relationship Management, Web Development, Requirement Gathering & Analysis, Technical Analysis, Team working capability
- **Technical:** Web Technologies – Angular, HTML, CSS, Bootstrap 3., Strapi, Docsify, Restful Web Services, Versioning Tool – VSTS, Git Hub

Projects Undertaken

1. MOB Portal

Client   : Mswipe

Role   : Software Engineer

Technology   : Angular18, HTML5, CSS3 and Boostrap, Figma.

Description:

- The MOB Portal provides POS solutions for all types of payment acceptance - cards, wallets, mobile payment apps and bank apps, contactless and QR payments.

Responsibilities:

- Designed user interfaces and experience flows using Figma to ensure a user-friendly and intuitive design.
- Developed responsive and interactive front-end interfaces using Angular 16, HTML5, CSS3, and Bootstrap.
- Maintaining high performance and compatibility across platforms and devices.
- Collaborated with the Business Analyst team to gather the requirements.
- Identified and resolved UI bugs and issues reported by the QA/testing team on a daily basis.

2. TaskNTrack

Client   : JDSports

Role   : Software Engineer

Technology   : Angular, HTML5, CSS3 and Bootstrap

Description:

- TasknTrack is developed to help streamline and organize in-house operations. To improve the productivity among the team and reduce communication bottlenecks. TasknTrack follows a unique traffic signal model for Task Management, which makes it easy for teams to use the app without much learning or training.

Responsibilities:

- Delivering a complete front-end application
- Managed full-cycle design tasks, handling all phases from conception to completion while maintaining guidelines throughout.
- Assembled and addressed technical and design requirements, integrating user-facing and front-end elements to maintain web presence effectiveness.
- Supporting team with providing technical solutions

3. MCarrots

Client   : MCarrots

Role   : Software Engineer

Technology   : Angular, HTML5, CSS3, Bootstrap

Description:

- Mcarrots is a mobile-based loyalty program that helps merchants to grow and increases customers & repeat purchases. Customers earn points on every purchase and redeem those points when it reaches the minimum points created by merchants. Mcarrots also provides reports to merchants and CRM for brands.

Responsibilities:

- Pinpointed user experience issues to devise targeted suggestions for improving user experience
- Managed full-cycle design tasks, handling all phases from conception to completion while maintaining guidelines throughout.
- Design various visualization layers in UI
- Analysed, prioritized, and problem-solved several tasks concurrently with minimum supervision

Personal Profile

Marital Status   :   Single

Nationality   :   Indian

Languages known   :   English, Hindi and Telugu.

Strengths	:	Relate well with People, Dedicated & committed to work.
Hobbies	:	Playing Cricket

- In addition to the above-mentioned I am capable of acquiring new skills and mastering new technologies quickly and focusing on a combination of technologies to provide efficient solutions as well.
