Mohammed Mubeenuddin

FrontEnd / Web Developer

E-MAIL:mmubeenmohd@gmail.com

Mobile (+91)9491066133

OBJECTIVE

To leverage my expertise in frontend development to create high-quality, responsive web and mobile applications. Focused on delivering efficient, scalable code using modern technologies like Vue.js, React.js, HTML5, and CSS3, I aim to enhance user experience while aligning with business goals. Dedicated to performance optimization, cross-browser compatibility, and continuous improvement through collaboration and innovation

SUMMARY

Experienced Frontend Developer with 6+ years of expertise in building high-performance web and mobile applications. Adept in translating complex business requirements into engaging, responsive, and user-friendly designs using the latest frontend technologies. Proficient in JavaScript frameworks (Vue, React), HTML5, CSS3, and more, I have a track record of collaborating closely with cross-functional teams in Agile environments to deliver high-quality code and superior user experiences. Known for my attention to detail, efficient problem-solving, and ability to adapt to new technologies and frameworks. Passionate about performance optimization, pixel-perfect design implementation, and continuous learning.

TECHNICAL SKILLS

- **Frontend Languages & Frameworks**: HTML5, CSS3, JavaScript, Vue.js, React.js, Angular, Bootstrap, Sass, Less, Materialize CSS
- **Web Development Tools**: Figma, Balsamiq, InVision, Mockplus, UXPin
- **CMS & Platforms**: Magento, Joomla, WordPress
- **Mobile Development**: React Native, Ionic, Android Studio
- **Version Control**: Git, GitHub
- **Agile & Scrum Methodologies**

Work Experience

Web Developer in **Virtus-It**

- Building user-friendly and responsive web/mobile application using Reactjs,VueJs,Redux & MIUI/Bootstrap
- Implement and manage application state using Redux or other state management libraries.
- Leading with product-analysis tasks and conducting performance tests.
- Integrate RESTful APIs, ensuring efficient and secure communication between the frontend and Backend
- Collaborating with other cross-functional teams to ensure high-performance of applications
- Identifying and troubleshooting issues with front end code

FrontEnd Developer Lead, From **28 Feb 2022** to **30Sep 2024** date in **Techdenali**

- Building and implementing top-notch user interfaces using JavaScript and the React/Vuejs framework.
- Writing efficient js code while also using HTML5, CSS3, Bootstrap / jQuery / JavaScript-based web design
- Good Knowledge on State Management/redux
- Developing application codes and unit tests in AngularJS, Java Technologies, and Rest Web Services
- Using the latest front-end technology, creating adaptable interfaces for online apps.

Adopt Health Care Feb 2018 to Mar 2020.

Analysis of products from the business objectives, user needs, and brand direction
Clearing the thoughts of product and drawing a use flow chart
Rapid prototyping to reach upto a final prototype design
Making low-fidelity prototypes and determining the final interactive plan on the base of user testing
Developing the low-fidelity prototypes/wireframes into eye-catching UI mockups
Create, plan, prepare, design and generate a wide variety of visual materials
Creating Mobile UI/UX for Android and IOS

FLO DATA Services Pvt Ltd (*Product Team - UX Evangelist & Strategist)*
 January 2016 – September 2017
- Played a key role in shaping company processes within the product team by adopting a more User-Centered Design approach.
- Advocated for good UX practices, balancing user needs with business objectives.
- Collaborated closely with the Head of Product to foster a culture of collaboration and innovation.
- Influenced product strategy, contributing to the creation of a roadmap that aligned with business and user goals**.**

Virtus-IT Pvt Ltd(*Web Designer & Concept Developer)*

October 2013 – December 2015
- Worked with a team of talented individuals to develop visually appealing and functional web projects.
- Held a conceptual design role, delivering creative solutions to complex challenges.
- Led the creation of innovative designs to enhance user engagement and achieve project goals.

Clearway Technologies *(Web Developer & Designer***)**

December 2011 – September 2013
- Developed creative concepts and design solutions for web systems and applications.
- Designed and implemented intuitive interfaces for websites and applications in collaboration with product developers and programmers.
- Focused on delivering user-friendly solutions while meeting technical requirements

Projects

DKSH Mobile and Web Application (B2b & B2C) (from Oct 2023 – working)
- Description: Developed mobile and web applications for DKSH to streamline supply chain management, sales tracking, and customer engagement. The platform provides real-time updates, order tracking, and analytics to improve operational efficiency.
- Tools and Technologies: React Native, React.js, Redux, Node.js, REST APIs, Firebase, Figma
- Roles and Responsibilities:
  - Mobile Application:
    - Designed and implemented a cross-platform mobile app using React Native.
    - Integrated Firebase for real-time data sync and notifications.
    - Developed features like order management, live tracking, and user notifications.
    - Conducted testing on both iOS and Android to ensure platform compatibility.
  - Web Application:
    - Built a responsive web interface using React.js and Bootstrap.

▪ Designed dashboards for sales tracking and analytics.

▪ Optimized the application for performance and scalability.

▪ Ensured seamless API integration for real-time data updates.

o Collaborated with cross-functional teams to gather requirements and ensure business goals were met.

2. **Store2Door Mobile Application (Customer and Partner App)** (Jan 2024 – Sep 2024,)

- Description: Developed a mobile application for customers and partners to facilitate seamless international shopping and shipping services. The app enables customers to browse products, track shipments, and manage orders, while partners can handle logistics and delivery.
- Tools and Technologies: React Native, Redux, Firebase, REST APIs, Figma
- Roles and Responsibilities:
  o Designed and developed a user-friendly interface for both customers and partners.
  o Integrated Firebase for real-time tracking and push notifications.
  o Implemented order management and logistics features for partners.
  o Collaborated with the backend team for API integration to support complex workflows.
  o Conducted user testing to gather feedback and enhance usabilit

3. **Store2Door Web Application** (May 2023 – Dec 2023)

- Description: Developed a web application for customers and partners to manage international shopping and shipping. The platform provides features like product browsing, order tracking, and logistics management.
- Tools and Technologies: React.js, Redux, Bootstrap, Node.js, REST APIs, Figma
- Roles and Responsibilities:
  o Designed and implemented a responsive and intuitive UI using React.js and Bootstrap.
  o Integrated REST APIs for real-time shipment tracking and order management.
  o Developed partner-specific dashboards for logistics and performance monitoring.
  o Conducted performance optimization to enhance load times and scalability.
  o Worked closely with the design team to ensure pixel-perfect implementation of Figma prototypes.

Arrow Electronics B2C Mobile and Web Application *(Mar 2022 – Feb 2023,)*

- **Description**: Designed and developed a B2C mobile and web platform for Arrow Electronics, enabling customers to explore, purchase, and manage electronic components and solutions. The platform provided seamless product discovery, real-time inventory updates, and personalized recommendations to enhance the user experience.
- **Tools and Technologies**: React Native, React.js, Redux, Node.js, REST APIs, MySQL, AWS CloudFront, Adobe XD
- **Roles and Responsibilities**:
  o **Mobile Application**:
    ▪ Built a user-centric mobile app using React Native with features like product search, wishlist, and purchase tracking.
    ▪ Integrated AWS CloudFront for faster content delivery and optimized performance.
    ▪ Developed personalized shopping experiences with dynamic recommendations based on user behavior.
    ▪ Ensured secure payment processing and implemented multi-factor authentication for customer accounts.

- o **Web Application**:
    - ▪ Created a responsive web portal using React.js and Material-UI to cater to desktop and tablet users.
    - ▪ Implemented robust search functionality with filters for products, categories, and pricing.
    - ▪ Designed dashboards for customers to track orders, manage returns, and view purchase history.
    - ▪ Developed real-time inventory and pricing updates via REST API integrations with the backend.
  - o Collaborated with the marketing team to ensure branding consistency across mobile and web platforms

Medineed Solutions

Medineed Solutions is a health care solution portal which has been established in view of expanding health care services in India. This portal provides varied range of services to doctors, hospitals, health care professionals, diagnostics and pharmacists.

Moya – The water man

Moya - The Waterman' is an on-the-go drinking water delivery service where you can order water online and connect to the nearest distributor in your surrounding areas. With a sole and noble aim to provide a hassle-free drinking water supply, the Water delivery app, Moya quenches your thirst at the tap of a button with its door delivery service at your residences, shops, offices and parties.

WashOnClick

washonclick is a network of technology-enabled car service centres, offering a seamless service experience at the convenience of a tap. With our highly skilled technicians, manufacturer recommended procedures and the promise of genuine spare parts and get instant update on service progress, and pay online for service

Flo-Data

Flo data captures, enriches and connects, filters, analyses, interprets and responds to your data, automatically & in real time.
It has sophisticated filtering system allows you to identify relevant devices.
Live time feed details all events and alerts cross your M2M network
Live map of all your devices with real time status and geolocation updates.
Live alerts based on your complex and customizable indicators (Key Performance Indicators).
Real time graphs and charts for all your indicators.

Motorola Data Cleaning APP

Renewal project have two applications Data Cleaning Application and CRM. Data Cleaning Application is used by Motorola to maintain and clean their business related data. CRM is divided into two parts Monthly notification and Call handling. Monthly notification is used to create campaign for their customers/end users and Call handling is used to assign task to the agents working for Motorola

RassiniIoT Solution

RassiniIoT Solution provides a web based utility to monitor and analyze the functioning of parts manufacturing machines in real time. The solution provides a real time visualization of various sensors data along with calculation of performance, availability, speeds, number of parts produced etc;, both at machine operator level as well as administration level
